RULING ON ENTITLEMENT¹

On April 30, 2021, Mark Peters filed a petition for compensation under the National Vaccine Injury Compensation Program, 42 U.S.C. §300aa-10, *et seq.*² (the “Vaccine Act”). Petitioner alleges that he suffered a shoulder injury related to vaccine administration (SIRVA) resulting from an influenza (flu) vaccination he received on October 1, 2020. Petition at 1. Petitioner further alleges that the vaccination was administered within the United States, he experienced pain and impairment for longer than six months, and neither he, nor any other party, has ever filed any other action or received compensation in the form of an award or settlement for his vaccine-related injury. Petition at 1, 6. The case was assigned to the Special Processing Unit of the Office of Special Masters.

On July 28, 2023, Respondent filed his Rule 4(c) report in which he concedes that Petitioner is entitled to compensation in this case. Respondent's Rule 4(c) Report at 1. Specifically, Respondent determined that "[P]etitioner had no history of pain, inflammation, or dysfunction of his left shoulder prior to vaccination; pain occurred within 48 hours after receipt of an intramuscular vaccination; pain was limited to the shoulder in which the vaccine was administered; and no other condition or abnormality has been identified to explain [P]etitioner's shoulder pain." *Id.* at 4. Respondent further agrees that Petitioner suffered the residual effects of his condition for more than six months.. *Id.*

In view of Respondent's position and the evidence of record, I find that Petitioner is entitled to compensation.

IT IS SO ORDERED.
